

NOTICE

Robotics & AI — Selection Test Syllabus | Class X

This is to inform all students that a Selection Test for Robotics & Artificial Intelligence will be conducted in the September. The syllabus covers all topics from April through August.

All Chapters of Pre-Selection Test	▸ Concepts of all previous chapters
Automated versus Autonomous Systems	▸ Concept of Automated versus Autonomous Systems ▸ Deterministic versus Probabilistic versus
Decision Making	▸ Human versus machine decision making ▸ Subjective and objective decision making ▸ Object classification by humans and computers/machines
Machine Learning (ML)	▸ Understanding of Machine Learning ▸ Role of data and information ▸ Steps in machine learning. ▸ Importance of programming and algorithms in teaching machines/ computers in subjective decision making
Machine Intelligence – Turing Test	▸ Human intelligence vs Machine Intelligence ▸ Turing test in AI: understanding only ▸ Connectivity between human intelligence and machine intelligence
Python — Modules and Packages	▸ Scope and uses of packages, modules and libraries ▸ An understanding of what NumPy and Matplotlib libraries are ▸ Implementation using simple programs in python ▸ The syntax of importing libraries

Best of luck, Class XI!
